Ralph Shareski Update: Results of the recent procedure confirm a healthy “looking” digestive tract, but the biopsy test results indicate that “GVH” (Graft versus Host) disease is present. This explains why Ralph has not been able to gain weight although he is eating well. A new, but stretched out, tapering of the steroid amount plan is now in place. Please pray that a turn in the road will soon take place.

Dayna Evanow prayer request for the Purely Girls 2013 Mission - that God would send His glory and fire as we camp in His Presence and for His breakthrough anointing to break every yoke and set the captive free. Pray for wisdom to know how to minister to each girl.
